- (54) Single and multi-polar implantable lead for sacral nerve electrical stimulation
- An implantable medical lead for stimulation of (57)the sacral nerves comprises a lead body 15 which includes a distal end and a proximal end, and the distal end having at least one electrode contact 20 having a length of between 2.5 mm and 37.5 mm (.10 and 1.50 inches) extending longitudinally from the distal end toward the proximal end. The lead body at its proximal end may be coupled to a pulse generator, additional intermediate wiring, or other stimulation device. The implantable medical lead can comprise a first 20 and second 40 electrode contacts. The second electrode contact has a length of between 0.75 mm and 25 mm (.030 and 1.00 inches) extending longitudinally from a point approximately 25 mm (1.00 inch) from the distal end toward the proximal end. The first and second electrode contacts do no overlap longitudinally. The implantable lead is implanted by taking the lead and implanting near the sacral nerves and then connecting to a pulse generator.

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 00 10 8055

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
